

## ABSTRACT

Topic:Kaithanghu

Project Nature: New Topic

Completion Level: Zero

The project entitled “**kaithanghu**” is a web-based application .The main objective of developing this project Kaithanghu is to users to find home nurses. It gives us the information about all the home nurses. It provides us the complete information of home nurses in a different category wise. Users can book home nurses .Home nurses can find medical shop near to the users house and can order the medicines online There is a delivery people corresponding to each medical shop to deliver the medicines. Home nurses salary is based upon the people they take care. Salary is paid by the users who book the home nurses.
